54824766 (numbers required for catering)

- Join a community of practice around alternative weed control methods and concepts.
- Opportunity to walk around and view progress of one-year-old alternative herbicides trial.
- Learn and discuss soil health and weed regrowth using a variety of different weed control methods including:

**Glyphosate ☒ Acetic Acid ☒ Pelargonic Acid ☒
Bioweed ☒ Mulching**

Presentations by:

- Dr Shahla Hosseini Bai, Soil Scientist, USC
- Tim Scott, BOS Rural, demonstration of alternative methods
- Dr Tanzi Smith from MRCCC about the project to date

Different treatments, 8 days after the 1st maintenance

This project is an initiative of the MRCCC that would not be possible without the collaboration of landholders Catherine and Jonathon Smith, Noosa and District Landcare, BOS Rural, the University of Sunshine Coast, the Department of Innovation, Science and Information and support from the Australian Government's Clean Energy Futures Fund.
